Clothilde's pedigree is rooted in the high-sloping French copper tubs of the 19th century, but her grand scale speaks to a new era of luxuriousness in the bath. Manufactured using the same artisanal methods as her ancestors, the heavy-gauge, hand-hammered copper is worked without visible seams and is lined with tin to ensure water purity. The copper, like the design, only improves with age.

Pier's arresting design brings comfort and creativity to the contemporary bath.  
The tub rests on a wooden slip of distressed oak with an espresso stain.  
This frame, which also serves as a towel bar, references the iconic American Parson's table while the tub's depth echoes Japanese soaking tubs.

## PIER

Unabashedly modern, .25 brings a sculptural sensibility and an aesthetic purity to the bath.  
The sensuous curves of this striking asymmetrical organic form —  
and its warm, matte finish — create a soothing experience for both mind and body.

From the voluptuous shape of its exterior to the luxurious depth of its comfortable, rounded interior, it's easy to see why Empire is a Waterworks favorite.
