DESIGN

A relaxed, informal fitting with a dramatic silhouette created through positive and negative space. This interplay of convex and concave shapes, and concentric rings, soften and unify the forms creating a rugged and austere handsome fitting.

FEATURES

Brass material is used for all trim and valve component parts.

The manufacturing process encompasses casting, turning, hand-fitting and hand polishing.

Meets national code standards ASME 112.8 $\frac{1}{4}$, CSA B125.1, ASSE 1016, NSF61, IAPMO CUPC, ANSI A117.1.

The unique handle is characterized by a concave bell escutcheon and a propeller-like spoke handle.

A comprehensive product line of fittings and accessories for the lavatory, shower, and bathtub.
